• About me

As a frontend engineer with expertise in React.js, i have a strong understanding of web development principles and the ability to build dynamic user interfaces using the React library.

• Experience Work

Junior Front-end Developer
2020 / 2022 - Kshop Nigeria.

- As a junior React JS developer on an ecommerce company, i create and maintain the website's user interface using React, work with a team to design and implement new features, fix bugs and optimize performance, and collaborate with designers to align with company branding.

junior Graphic Design
2019/ 2021 - Wisdom place church.

- As a junior graphic designer working for a church company, my responsibilities included creating and designing visual materials such as flyers, brochures, posters, and other marketing materials to promote events and activities. I also assisted in the development and maintenance of the church's branding and visual identity. Additionally, I may have been responsible for designing and maintaining the church website and social media accounts.

Junior Front-end Developer
2022 / Present - Bilwill.inc

- As a junior front-end developer working for a social media company, my responsibilities included developing and maintaining the user-facing features of the platform. This included using technologies such as HTML, CSS and JavaScript to build the website and mobile app interfaces. I also collaborated with the design and back-end development teams to ensure a seamless user experience. Additionally, I was responsible for testing and debugging any issues that arise in the front-end.
